

Worksheet - 4 Types of Angles

Section A : MCQ

- ① The angle that forms exactly a half turn (a straight line) is called a:
- a) Right angle b) Acute Angle c) Straight angle d) Obtuse angle
- ② An angle that is less than a quarter turn (less than a right angle) is
- a) Acute b) Obtuse c) Straight d) Full
- ③ Two lines that intersect to form exactly equal adjacent angles (right angles) are called
- a) Parallel lines b) Perpendicular lines c) Straight lines d) Oblique lines
- ④ A full turn is equal to:
- a) 2 right angles b) 3 right angles c) 4 right angles d) 1 straight angle
- ⑤ Which of these real-life scenarios represents a right angle?
- a) An open book lying flat on a table
- b) The corner of a square piece of paper
- c) A slightly open door
- d) A fully closed pair of scissors.

Section B: fill in the Blanks.

6. The angle made by a book opened flat on a desk _____.

7. The angle made by letter 'L' _____.

8. The angle of slide in a playground with the ground _____.

9. An angle greater than a right angle but less than a straight angle _____.

10. The angle made by the letter 'V' _____.

Section-C

11. A straight angle contains exactly _____ right angle.

12. An angle smaller than a right angle is called an _____ angle.

13. If you divide a straight line into two equal angles, each angle is a _____ angle.

14. A complete circle represents a _____ turn.

15. The letter 'X' contains both acute & _____ angle.
